

LABQUALITY

External Quality Assessment Programs

Holotranscobalamin (HoloTC) and Methylmalonic Acid

Labquality is arranging a new EQA scheme for Holotranscobalamin (HoloTC) and Methylmalonic Acid. The scheme is suitable for different assays. The EQA samples should be analysed as regular patient samples. Participants submit their results through the electronic platform LabScala, and results are processed by the EQA coordinator. Results will be evaluated according to method groups based on chemical principles and result levels.

Please note that you can participate in this pilot study for both analytes or for Holotranscobalamin only.

2755 Holotranscobalamin (HoloTC) and Methylmalonic Acid

Samples: 2 lyophilized serum samples free-of-charge for a limited number of participants
Distribution: October/November 2024
Registration: Please register via [this link](#) or by scanning this QR code no later than 15 September 2024
