

External Quality Assessment Program for

## Human Erythropoietin and Thrombopoietin

Labquality EQAS by Aurevia is introducing a new EQA scheme for human Erythropoietin and Thrombopoietin by arranging a pilot study free of charge for a limited number of participants. The scheme is suitable for different assays. The EQA samples should be analysed as regular patient samples. Participants submit their results through the electronic platform LabScala, and results are processed by the EQA Coordinator. Results will be evaluated according to method groups based on chemical principles and result levels. Please note that you can participate in this pilot study for both analytes or only either one analyte individually.

### 2708 Human Erythropoietin and Thrombopoietin

Samples: 2 lyophilized serum samples

Distribution: March 2025

Registration: Please register by [this link](#) or by scanning this QR code no later than 24 February 2025
