

# LABQUALITY

## External Quality Assessment Program for *Helicobacter pylori*, nucleic acid detection

Labquality is announcing a new EQA scheme for nucleic acid detection of *Helicobacter pylori*. The scheme will be suitable for different methods. The EQA samples should be analysed as regular patient samples. The participants submit their results through the electronic platform LabScala and results are processed by the EQA Coordinator. Result evaluations including expert comments will be published in the final report distributed to the participants.

Round 1, 2023 will be a pilot study free of charge for a limited number of participants. The pilot round will open in September-October.

### 5253 *Helicobacter pylori*, nucleic acid detection

Samples: 3-4 liquid/swab/lyophilized samples  
Distribution: 1, 2023 September-October – free-of-charge pilot study  
Participation: Limited number of samples available  
Registration: Please register by **August 15th, 2023** only via [this link](#).
