## External Quality Assessment Program for Maternal Serum Screening

Labquality is announcing a new EQA scheme for Maternal serum screening suitable for first and/or second trimester screenings including analytes AFP, b-hCG, Inhibin A, PAPP-A, total hCG and unconjugated Estriol. The scheme is suitable for different assays. The EQA samples should be analysed as regular patient samples. Participants submit their results through the electronic platform LabScala and results are processed by the EQA coordinator. Result evaluations including expert comments will be published in the final report distributed to the participants.

Round 1, 2023 will be a pilot study free of charge for a limited number of participants. The pilot round will open in September-October. Two rounds will be included in the program of 2024.

### 2707 Maternal serum screening – pilot study

- Samples: 3 lyophilized serum samples
- Distribution: 1, 2023 October-November – free-of-charge pilot study
- Participation: Limited number of samples available
- Registration: Please register by **August 15th, 2023** only via [this link](#).

Please note, if you have already registered through the general pilot registration link earlier this year, no further actions are needed.
